

BRAKING SYSTEM

HYDRAULIC DISC BRAKE SET

Powerful modulation. Complete front-and-rear control.

PRODUCT HIGHLIGHTS

- 1

Matched front and rear hydraulic brake assemblies
- 2

Four-piston calipers for confident braking control
- 3

Ergonomic two-finger levers with reach adjustment
- 4

Two-piece six-bolt rotors and installation hardware

KOHPER PERFORMANCE

TECHNICAL SPECIFICATIONS

|                |                                 |
|----------------|---------------------------------|
| CALIPERS       | 4-piston front and rear         |
| FLUID          | Mineral-oil concept system      |
| ROTORS         | Two-piece, 6-bolt; 180 / 160 mm |
| HOSES          | Front 900 mm / rear 1700 mm     |
| MOUNTS         | Post-mount calipers             |
| CONCEPT WEIGHT | Approx. 980 g complete set      |

COMPATIBILITY / FITMENT

Concept system for common post-mount frames and forks using six-bolt hubs. Rotor size, adapters, hose routing, and lever orientation must match the bicycle.

MOCKUP SPECIFICATION — values are preliminary concept targets. Final dimensions, weights, materials, compliance, and compatibility require engineering validation.
